

Practice information

Dental Emergencies

If you have a dental emergency during practice hours, please telephone as early as possible to give us time to see and treat you. If you have a dental emergency outside of practice hours please telephone the practice and listen to the answer phone instructions. We offer an on-call service for all our patients.

Practice Hours

Mon & Thu9.00am to 6.00pm
Tuesday9.00am to 7.00pm
Friday.....8.30am to 5.30pm
Saturday.....Emergencies only

Appointments

Please respect our appointment system and give us as much notice as possible if you are unable to attend. Failure to give a minimum of 24hr notice of a cancellation may result in a charge.

Disabled Access

There is a handrail at the side of the few steps leading into the practice and team members are always on hand to help if required.

Payment

Dental treatment is an excellent investment in an individual's health and well being. Because of this, we believe financial consideration should not be an obstacle to obtaining a procedure. Being sensitive to the fact that different patients have different needs, we provide the following payment options:

- We accept cheques, cash and most credit/debit cards

- We are able to offer easy payment plans, spreading the cost of your dental payment over a period of time
 - A "Patient Managed Plan"
 - Chrysalis Credit Payment Plan

By spreading your repayments over a number of years with low monthly instalments, you can afford the cosmetic treatment that you've been putting off for years!

Guaranteed Treatments

- We guarantee all of our treatment for 1 year
- Our crowns and bridgework are guaranteed for 2 years

Loyalty and Referral Bonuses

Don't keep our clinic a secret from your friends and family. Share the news and everyone is rewarded. For your help you will receive a referral bonus of a free hygienist visit.

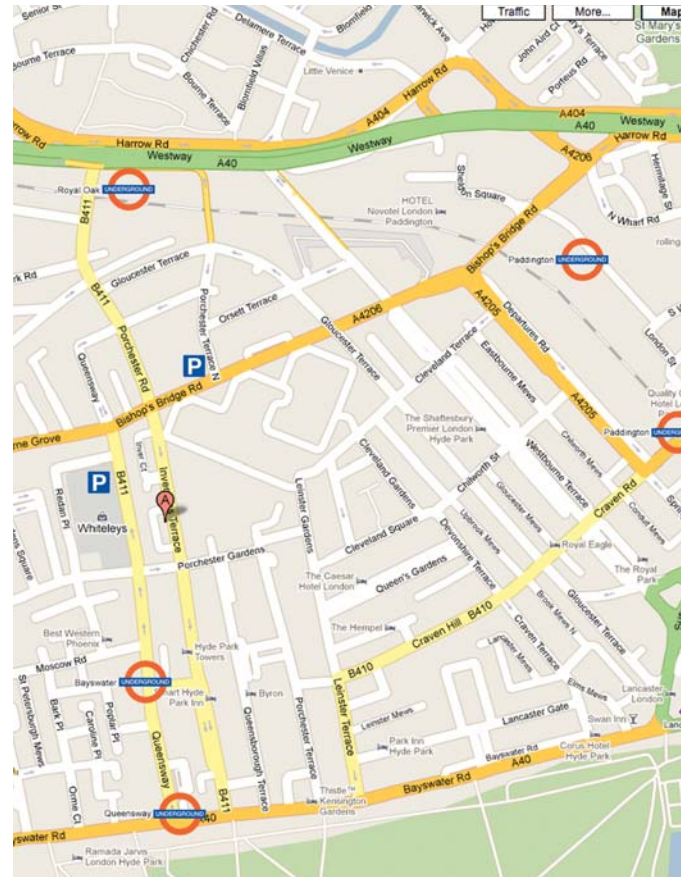

Family Discount

- Introduce your partner and he/she will have their first examination free
- Children up to the age of 18, whose parents are existing patients are examined free of charge

Discounts

- Discounts for larger treatment plans
- Discounts for many services for senior citizens

Please speak to our reception team who can guide you through the payment options available to you.

bayswater dentol clinic

Healthy teeth are a symbol of good hygiene, care and basic beauty

At Bayswater Dental Clinic we have been caring for the healthy smiles of our patients for more than forty years. We have the knowledge, experience and technology to help you achieve a winning and confident smile, whilst stressing the preventive approach. Our aim is to provide you with first class dentistry in a friendly, relaxed and professional environment.

The Team

Dr Brian Clarke, our principal dentist, with a special interest in cosmetic restoration, leads an experienced and dedicated team of dental professionals, all registered with the General Dental Council. To plan for your every dental need, we work closely with our London based dental laboratories and have trusted colleagues to whom we can refer for specialist treatments.

The senior nurse, Tanya and practice manager, Barbara, ensure that your visit is as pleasant and comfortable as possible; along with them, our doctors and hygienists are all committed to providing high quality dental care in a safe, clean environment and take the time to listen to YOU, our patients.

helping you
to smile with
confidence

Our services

Registered with and regulated by the Care Quality Commission (CQC), you can relax in our clinic, assured of care and attention, as we listen to your concerns and needs, from a consultation through to creating a beautiful new smile. Treatment options will be explained to you, so that you can make an informed choice.

TREATMENTS INCLUDE:

Tooth Whitening

We use an advanced and simple method from Optident, to lighten the colour of your teeth; with an initial surgery boost and then completion at home.

Cosmetic Restorations - Natural coloured fillings

Metal and discoloured fillings can be replaced by naturally coloured restorations, matching your teeth and improving the look of your smile. Many chipped, fractured and worn teeth can also be "invisibly repaired" with our new generation of tooth coloured composite restoratives.

Porcelain Veneers - Smile Makeovers

Veneers provide a wafer thin covering to hide discoloration on teeth, reshape teeth and close gaps with little work being needed on the tooth itself.

Crowns & bridges - Smile Makeovers

Heavily filled and broken teeth can be covered with crowns and spaces between teeth can be filled using bridges. Advances in ceramic technology allow these teeth to appear natural and black lines around gum margins are less likely to occur.

Implant restorations

Dental implants are permanent, fixed replacements for missing teeth; they look like, feel like and are as robust as your natural teeth. A series of implants can be used to replace dentures. Our clinic concentrates on using the Bicon system.

Hygiene services

Our hygienists work closely with the dentist to prevent and treat gum disease. They provide routine 'scale and polish' appointments to remove tartar from teeth and will advise you on oral hygiene routines to help you maintain your healthy gums.

Clenching/grinding guards

We offer night and day guards to prevent the teeth clenching and grinding, thus eliminating the side effects from this common problem e.g. tooth damage, sensitive teeth, headaches and jaw joint ache.

Anti-Snoring device

Sleepwell™ is a custom made mouthpiece which fits over your teeth. It prevents the lower jaw from dropping back during sleep, thus preventing the closure of your airways – an effective stop snoring remedy.

To calm your concerns, and create a soothing environment, we play relaxing music and for the very apprehensive, your treatment can be carried out under sedation from a tablet taken just beforehand or more profoundly with light intravenous sedation. Your hygiene treatment can be carried out with an anaesthetic jelly, just dripped onto the gums.

Some restorative treatment requires no drilling and no injections – ask if micro-abrasion is suitable for you

"I first came to Brian 20 years ago in great distress with an infected front molar which my dentist at the time wanted to extract. Brian saved that tooth by fitting me with my first crown and he and his excellent team have been caring for my teeth ever since. I very much value Brian's skills as a dentist and also his unfailing gentleness and courtesy which make a visit to the dentist a pain free and reassuring experience. It's good to know I can always smile with confidence!"

Wendy Cole

"Fear and bad experience kept me away from a dentist for a number of years. Then two years ago a friend recommended Dr Clarke. His skill, communication and reassurance as well as his team's caring and sensitive approach made each 20 mile journey to the Bayswater Dental Clinic almost something to look forward to. Dr Clarke's excellent restorative dental work gave me a winning smile and brought many compliments."

Barbara Waugh

"I thoroughly enjoyed my treatment and feel quite confident and glamorous now."

Beryl Granger

"I have been a patient of Dr. Clarke since he qualified some 40 years ago and am delighted to say that with his care and skill I still possess all my own teeth, many with crowns that have lasted longer than the original teeth they replaced. The same goes for my entire family. Long may Dr. Clarke continue to practice."

Bernard Kaye
